Fresh tea and coffee. Run by AI.

Smart vending for workplaces. Every machine is connected, and AI keeps it stocked and running.

What the AI does

DATA FROM EVERY MACHINE

01

Preventive & predictive maintenance

Spots early warning signs and fixes issues before a breakdown.

02

Demand forecasting

Predicts what each site needs, so stockouts don't happen.

03

Consumption insights

Tracks consumption patterns and hot-moving items at every site.

THREE EXPERTS. ONE SYSTEM.

Ayisra™

Machines

Bean-to-cup machines built in Bengaluru.

RAZODAY

Tea & coffee

Premium Nilgiri tea and coffee, crafted since 1997.

etidhi

AI Automated Systems

Connects the machines and turns data into decisions.

Bring ACTeaVE to your workplace.

Economies of scale with 10 or more machines in a single location.

collab@etidhi.in →

Machine data in. Smart decisions out.

Every machine reports through the Internet of Things (IoT). AI reads the data and tells your team what to do next.

WHAT THE AI TELLS YOU

When to service

Early warning signs, so repairs happen before a breakdown.

What to refill

Demand forecasts, so stock arrives exactly when needed.

How each site is used

Busy hours and favourite drinks, office by office.

Where money is lost

Wasted trips and idle machines, flagged automatically.

Less downtime. Lower running costs.
